GAURAV ZALAVADIYA

Senior QA Engineer | Mobile Application Testing (Android & iOS)

Surat, Gujarat, India

8849485558 | gauravzalavadiya123@gmail.com

Profile

A highly motivated and detail-oriented QA professional with nearly 3 years of experience in manual and automation testing of web and mobile applications. Currently working as a Senior QA in a product department, responsible for end-to-end testing of Android and iOS mobile applications, defect management, and mobile test automation using Maestro Studio. Experienced in building an AI-based testing agent to speed up mobile application testing, along with strong skills in test case design, regression testing, and client communication. Passionate about staying up to date with the latest advancements in technology, particularly in testing automation, AI-driven QA, and emerging testing frameworks.

EXPERIENCE

Vasundhara Infotech, Surat, Gujarat
Senior QA – Product Department – March 2026 to Present

Senior Quality Assurance Engineer in the product department, responsible for the complete quality of Android and iOS mobile applications. Handling end-to-end manual testing, defect reporting, and release validation, along with mobile test automation using Maestro Studio. Designed and developed an in-house AI agent for mobile application testing to reduce manual effort and improve test coverage.

Key Responsibilities & Work Scope :

- Performing end-to-end testing of Android and iOS mobile applications
- Conducting functional, UI/UX, regression, smoke, and sanity testing
- Identifying, reporting, and tracking bugs through to closure
- Preparing and executing test cases, test scenarios, and test reports
- Developed an AI agent for automated testing of mobile applications
- Automating mobile application test flows using Maestro Studio
- Creating and maintaining automation scripts for regression suites
- Validating builds across multiple devices, screen sizes, and OS versions
- Verifying APK and IPA builds before release and supporting release validation
- Participating in requirement analysis and product feature discussions
- Coordinating with developers and the product team for bug resolution and retesting
